▲ TRIFECTA — Screener Report

Data as of the **2026-10-23** close · Report generated 2026-10-24 · All grading is over **confirmed signals only**, measured since the Early trigger, split/dividend adjusted. Fundamentals and market cap are point-in-time (SEC EDGAR as filed on or before each signal date). Badges are ranking tags, never an admission gate.

The badge ladder

Badge	Signals	Up since trigger	Mean	Median	Positive @ +90d
EXHAUSTION ★	50	86.0%	+23.7%	+15.9%	78.6%
CAPITULATION	92	78.3%	+21.5%	+15.5%	79.1%
WASHOUT	349	72.8%	+14.2%	+8.2%	80.5%
No badge	842	54.9%	+1.0%	+1.4%	66.1%

Badges grade the strength of the bottom evidence present at a Quality signal's trigger — WASHOUT, CAPITULATION, ★ EXHAUSTION, in ascending strength. Junk names earn no badge. The evidence tests behind the badges are part of the Trifecta member methodology.

About this record: backfill 2026-04-23 to 2026-10-22. Early = the Trifecta trigger — RSI, the fast stochastic, and MACD bottoming together in a tight cluster; Confirmed = the MACD confirmation within its window. Quality and Junk are the screener's point-in-time fundamental categories (SEC EDGAR as filed on or before each signal date), with size and liquidity floors; exchange-listed stocks only. The signal log is append-only — admission at the trigger is final. Early signals that never confirmed (640) are excluded from every statistic above. The full methodology — trigger thresholds, confirmation rules, category tests, and badge evidence tests — is reserved for members. This report is an investigation aid, not investment advice.
